Electrical Movable Shelving System

KARDEX[®]

Kardex Systems introduces a multi-purpose electrical movable shelving system created to meet the filing and storage needs of today's offices and facilities economically and efficiently... Kompakt EL/C movable shelving.

The Kompakt EL/C is designed to deliver maximum high-density storage in minimal floor space.

Engineered to meet the weight-load and space requirements of almost any storage or filing application.

Manufactured to provide long-term reliability and low maintenance, Kompakt EL/C carriages utilize 11 GA. steel and are rated at a minimum capacity of 1000#/FT.

Slim-profile end panels eliminate wasted space and increase storage capacity on every tier of shelving.

KARDEX

KOMPAKT EL/C

Electrical Movable Shelving System

Overhead Cable Arm Raceway supplies power and communication between ranges and provides up to a 60" aisle as standard. A **Patent Pending**, programmable Aisle Width Sensor, totally eliminates the need for commonly used carriage limit switches.

Control Console utilizes state of the art **digital technology**. Digital technology provides for a more reliable system as well as allowing easier configuration for future design enhancements. The Control Console visually displays system and operator information in text format, affording the operator enhanced usability. Also, to provide for the safest operation of the system, the Control Console is located adjacent to the aisle controlled. The Control Bezel is available in a choice of black or light gray.

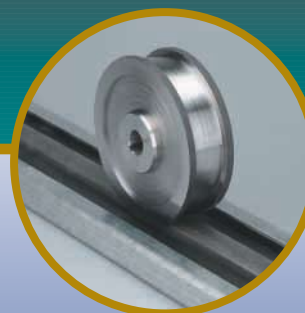

Floor Level Safety Bar is supplied the full length of the carriage, one per possible aisle as standard, and can be activated with as little as 8 oz. of pressure. Floor Level Safety Bars are available on both sides of an aisle as an option.

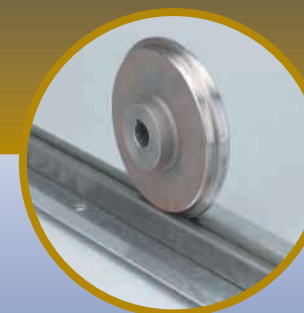

Kompakt EL/C by Kardex is made in the USA and is totally U.L. Listed with either the Floor Level Safety Bar or with the optional Photo Sweep.

Two Heavy Duty Wheel & Rail Designs

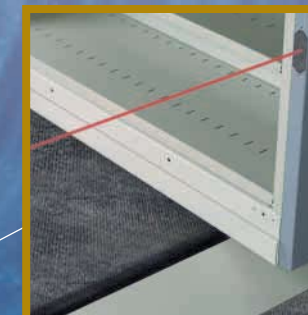

Low-Profile Double-Flanged

True 5" diameter wheels throughout are fitted with permanently-lubricated pillow block wheel bearings which deliver smooth, consistent performance with no maintenance requirements.

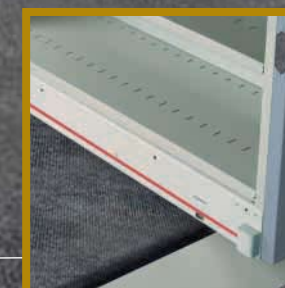

Low-Profile Center-Flanged

Complete size flexibility with system heights from 4' to 12'; carriage lengths from 3' to 60'; and carriage depths from 1' to 5' with single or double-entry shelving.

Optional Aisle Entry Sensor detects persons or carts entering an open aisle. Dual Aisle Entry Sensors are available as an option for dual access systems.

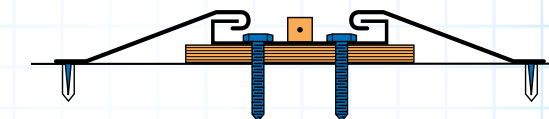

Optional Photo Sweep (one per possible aisle) can be used with or without the standard Floor Level Safety Bar. Waist level safety is available as an option.

Rail Options

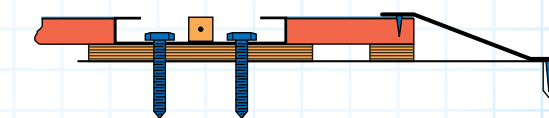

Rail Ramp System

maintains existing floor covering without modification.

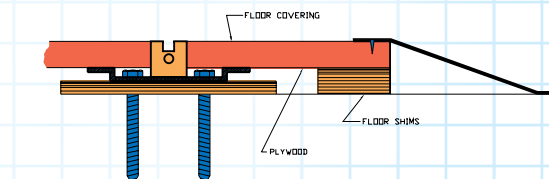

Sub-floor System – C-Channel Rail with Stainless Steel Ramp

can be carpeted or tiled to the top level of the rail.

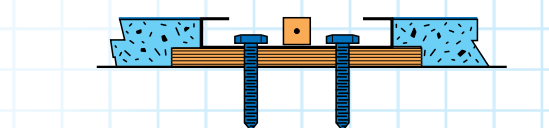

Sub-floor System – Center Grooved Rail with Stainless Steel Ramp

can be carpeted or tiled to the top level of the rail.

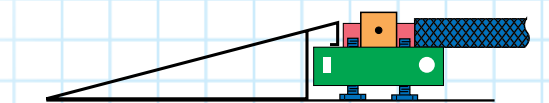

Concrete-embedded System

provides flush installation in new construction.

Modular Deck

offers non-permanent installations for leased quarters. Does not require any floor attachment.
